## Experiences of family caregivers nursing cancer patients at home

Understanding the positive and negative experience of family caregivers including, challenges, needs, enablers, motivators and support to provide cancer care to patients at home.

Objectives:

1. To conduct a qualitative systematic review" Experiences of family caregivers nursing cancer patients at home".
2. To conduct 30 in-depth interviews with caregivers of cancer.

I expect to understand more about the caregivers needs when nursing cancer patients at home.

**Research Task 2**

**Supervisors:** Charmaine Blanchard and Dr. Maureen Joffe
